

ABDULLA HASHIR ALI

NODE.JS DEVELOPER | SENIOR PHP & LARAVEL DEVELOPER | FULL STACK DEVELOPER

Thrissur, Kerala, India | hashirbinali@gmail.com | +91 7736881988 | linkedin.com/in/abdulla-hashir-ali-p-c-63926615b

PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years of experience in PHP, Laravel, and CodeIgniter development, building enterprise web applications, RESTful APIs, and database-driven systems. Hands-on experience in Node.js and Express.js, including architecting and building a SOAP API biometric attendance integration with custom punch-in/punch-out matching logic as a backend service. Deep expertise in PHP, Laravel, CodeIgniter, Core PHP, and MySQL, applying Object-Oriented Programming (OOP) and MVC architecture to deliver scalable, secure, and maintainable backend systems. Proven track record integrating third-party and SOAP APIs, customizing ERPNext for enterprise workflows, and developing OpenCart-based e-commerce platforms. Skilled in full-stack delivery using Vue.js and Nuxt.js. Experienced with AWS-hosted deployments, CI/CD pipelines, and Git-based version control, and committed to code quality through structured testing, debugging, and performance optimization across the full SDLC.

CORE TECHNICAL SKILLS

Backend Development: PHP, Laravel, CodeIgniter, Core PHP, OOP, MVC Architecture, RESTful APIs, SOAP APIs, Third-Party API Integration, Webhooks, JSON, Authentication & Authorization, Node.js, Express.js

Frontend Development: JavaScript, Vue.js, Nuxt.js, Next.js, AngularJS, HTML, CSS

Database: MySQL, Database Design, SQL Query Optimization

Enterprise & E-Commerce: ERPNext Customization, OpenCart, Drupal

Cloud & DevOps: AWS, CI/CD Pipelines, Git

Testing & Quality: PHPUnit, Postman, Testing & Debugging, Performance Optimization, SDLC

PROFESSIONAL EXPERIENCE

Software Engineer

Dec 2024 – Present

Poornam Info Vision Private Limited, Kakkanad, Ernakulam

- Design, develop, and maintain enterprise web applications using Laravel and Core PHP, applying MVC architecture and OOP principles to ensure reliability, performance, and alignment with business requirements.
- Customize ERPNext modules and workflows to support client-specific operational processes, extending core functionality to meet enterprise requirements.
- Design, build, and integrate RESTful APIs, including SOAP-based third-party integrations, to connect enterprise systems and automate business processes.
- Develop and customize OpenCart-based e-commerce functionality, including backend integrations with internal and third-party systems.
- Architected and developed a SOAP API integration with a biometric attendance system using Node.js and Express.js, implementing custom punch-in/punch-out matching logic for accurate attendance processing; built and deployed as an additional backend service alongside core PHP/Laravel systems.
- Own testing, debugging, and issue resolution across releases, maintaining production stability for enterprise applications.
- Support application deployments through CI/CD pipelines and AWS-hosted environments, ensuring reliable and repeatable releases.
- Apply AI-assisted development tools to accelerate coding, debugging, technical research, documentation, and solution design.
- Personally recognized by the client for high-quality code, reliable delivery, prompt support, and professional collaboration on a large-scale website, mobile app, physical device, and IoT project.

Software Engineer

Jun 2023 – Dec 2024

Global Establishment Pvt Ltd, Kaloor, Ernakulam

- Designed and integrated MySQL-backed database solutions for multiple client applications, including schema design and query optimization.
- Built and consumed RESTful APIs connecting backend services, frontend applications, and third-party platforms.
- Delivered full-stack features using Laravel, CodeIgniter, and Core PHP for backend development and Vue.js and Nuxt.js for frontend applications.
- Performed functional testing and technical troubleshooting alongside development responsibilities to maintain code quality.
- Delivered features on schedule while collaborating with engineering, cross-functional, and client teams.

Software Engineer

May 2022 – Apr 2023

ImmplyCloud Pvt Ltd, Pune, Maharashtra

- Developed reusable and maintainable PHP, CodeIgniter, and AngularJS modules across multiple project areas.
- Integrated database solutions and optimized applications for performance and scalability.
- Collaborated with frontend developers on API integration and UI requirements.
- Performed testing and debugging to identify and resolve issues before release.

Associate Software Engineer

Feb 2021 – Apr 2022

Digitalmesh Softech Pvt Ltd, Kakkanad, Ernakulam

- Worked directly with clients and team members to translate business requirements into working software solutions using CodeIgniter and Core PHP.
- Developed frontend components using HTML, CSS, and JavaScript, and performed unit testing.

EDUCATION

Bachelor of Computer Science

2016 – 2019

Mother Arts & Science College, Thrissur, Kerala

PROFESSIONAL STRENGTHS

- Senior-level PHP & Laravel backend architecture and development
- RESTful and SOAP API design, integration, and third-party connectivity, including Node.js/Express.js backend services
- Enterprise and e-commerce application customization (ERPNext, OpenCart)
- Full-stack delivery with Vue.js and Nuxt.js
- Testing, debugging, and production release readiness
- Client requirement analysis and cross-functional collaboration

CLIENT RECOGNITION

Received direct client recognition for contributing high-quality code, exceptional communication, responsiveness, professionalism, and reliable delivery on a complex project covering web, mobile applications, physical devices, and IoT.
